

Access Vaccines Bexsero Only Discount Program

Access Vaccine's Bexsero Only Discount Program provides the members with lowest national price for Bexsero on the market. Bexsero is a 30-day series completion (compared to 6-month completion of Trumenba) resulting in patients being fully protected much sooner. This quick series completion can be done over winter or spring breaks. Bexsero has a 70% market share due to its ease and success of series completion.
